

Advanced Microwave Dish Antenna For Targeted Signal Reception

Basic Information

- Supply Ability: 3000 Set/Sets per Month

Product Specification

- Type: Parabolic Antenna
- Frequency Range: 3600MHz-3800MHz
- Gain: 23.5 DBi
- VSWR: 2 Max
- Front To Back Ratio: 25dB Min
- Connector Type: 2*N-Type Female
- Radome Material: Aluminium Alloy
- Lightning Protection: DC Grounded
- Highlight: **Advanced Microwave Dish Antenna,
Targeted Signal Reception Microwave Dish
Antenna
, Advanced Parabolic Dish Antenna**

Product Description

Advanced Microwave Dish Antenna For Targeted Signal Reception

Enhanced Signal Fidelity:

By focusing incoming and outgoing signals with precision, Microwave Dish Antennas enhance signal fidelity. This results in reduced signal degradation, minimized interference, and improved data throughput, making them ideal for high-performance communication networks that demand uncompromised reliability.

Versatility Across Frequencies:

Another notable advantage of high-gain Microwave Dish Antennas is their versatility across frequency bands. They can seamlessly operate across a wide spectrum of microwave frequencies, catering to diverse communication needs ranging from broadband data transmission to specific frequency-dependent applications.

Applications Across Industries:

The high-gain capabilities of Microwave Dish Antennas find extensive applications across various industries. From telecommunications and broadcasting to satellite communications, radar systems, and beyond, these antennas play a pivotal role in establishing robust and efficient wireless communication networks.

MECHANICAL SPECIFICATIONS

Frequency (MHz)	2400-2500
Gain(dBi)	22
Beam-Width	14°/12°
Polarization Type	±90°
VSWR	≤2
Front to back Ratio	≥25dB
Lightning Protection	DC Grounded
Support Pole Diameter(mm)	30-60
Connector Type	2*N-Type Female
Dimensions H*W*D(mm)	600
Radome Material	Aluminium alloy
